

# Case Study

## All Trees Plotted

Clients sometimes require a full plot of all trees under their control. This may be a residential garden, or large scale estate.

## Accurate Data

All field work is supported by the latest in hardware and software. This ensures efficiencies and accuracy.

## Qualified

All inspection work is undertaken by consultants holding QCF (Qualifications and Credit Framework) level 5 or above. This protects you by ensuring the highest quality and expertise.

## 5%

We only identify the work you need to do to abate risk. Experience tells us this will be approximately 5% of any tree population.

“We had concerns that a volume survey would identify excessive tree works. The inspection was of a high quality and all tree works were fully justified”.
