Asset Disposal

A local authority within Oxfordshire was looking to redevelop a redundant care home site close to the town centre.

Tree Survey

A BS5837 compliant site survey was undertaken paying particular attention to large 3rd party trees which constrained the development footprint.

Fast Turnaround

From instruction to production of the report and supporting Tree Constraint Plan and Tree Protection Plan was 6 working days. This exceeded client expectations.

“We have worked with this consultant for 4 different sites to provide Arboricultural Impact Assessments and Method Statements. They have been very helpful and very quick to produce their reports.

I can highly recommend them to any commercial organisation.”
